### **The Sheltering Sky**

A beautiful 65th anniversary paperback edition of the landmark literary work by acclaimed author Paul Bowles. In this classic work of psychological terror, Paul Bowles examines the ways in which Americans apprehend an alien culture--and the ways in which their incomprehension destroys them. The story of three American travelers adrift in the cities and deserts of North Africa after World War II, *The Sheltering Sky* is at once merciless and heartbreaking in its compassion. It etches the limits of human reason and intelligence--perhaps even the limits of human life--when they touch the unfathomable emptiness and impassive cruelty of the desert.

### **Moribito: Guardian of the Spirit**

Now Balsa must protect the boy -- the Prince Chagum -- on his quest to deliver the great egg of the water spirit to its source in the sea. As they travel across the land of Yogo and discover the truth about the spirit, they find themselves hunted by two deadly enemies: the egg-eating monster Rarunga . . . and the prince's own father.

## **Life and Teaching of the Masters of the Far East**

2010 Reprint of 1924 Edition. In 1924 Spalding published this first and most important volume of *Life and Teaching of the Masters of the Far East*. It describes the travels to India and Tibet of a research party of eleven scientists in 1894. During their trip they claim to have made contact with "the Great Masters of the Himalayas," immortal beings with whom they lived and studied, gaining a fascinating insight into their lives and spiritual message. This close contact enabled them to witness many of the spiritual principles evinced by these Great Masters translated into their everyday lives, which could be described as 'miracles'. Such examples are walking on water, or manifesting bread to feed the hungry party. These books have remained consistently popular with spiritual seekers, those interested in the philosophy of the East and those who enjoy a good story because of their accessible nature and easy-to-follow format. However, despite most of the action taking place in India, the Great Masters make it clear that the greatest embodiment of the Enlightened state is that of the Christ (as personified by Jesus): "The Masters accept that Buddha represents the Way to Enlightenment, but they clearly set forth that Christ IS Enlightenment, or a state of consciousness for which we are all seeking - the Christ light of every individual; therefore, the light of every child born into the world."

## **Global Health and the Future Role of the United States**

While much progress has been made on achieving the Millennium Development Goals over the last decade, the number and complexity of global health challenges has persisted. Growing forces for globalization have increased the interconnectedness of the world and our interdependency on other countries, economies, and cultures. Monumental growth in international travel and trade have brought improved access to goods and

services for many, but also carry ongoing and ever-present threats of zoonotic spillover and infectious disease outbreaks that threaten all. Global Health and the Future Role of the United States identifies global health priorities in light of current and emerging world threats. This report assesses the current global health landscape and how challenges, actions, and players have evolved over the last decade across a wide range of issues, and provides recommendations on how to increase responsiveness, coordination, and efficiency both within the U.S. government and across the global health field.

## **Catch Me If You Can**

The uproarious, bestselling true story of the world's most sought-after con man, immortalized by Leonardo DiCaprio in DreamWorks' feature film of the same name, from the author of Scam Me If You Can. Frank W. Abagnale, alias Frank Williams, Robert Conrad, Frank Adams, and Robert Monjo, was one of the most daring con men, forgers, imposters, and escape artists in history. In his brief but notorious criminal career, Abagnale donned a pilot's uniform and copiloted a Pan Am jet, masqueraded as the supervising resident of a hospital, practiced law without a license, passed himself off as a college sociology professor, and cashed over \$2.5 million in forged checks, all before he was twenty-one. Known by the police of twenty-six foreign countries and all fifty states as "The Skywayman," Abagnale lived a sumptuous life on the lam—until the law caught up with him. Now recognized as the nation's leading authority on financial foul play, Abagnale is a charming rogue whose hilarious, stranger-than-fiction international escapades, and ingenious escapes—including one from an airplane—make *Catch Me If You Can* an irresistible tale of deceit.

## **Cringeworthy**

Examines the ways that embracing socially awkward situations, even when they lead to embarrassment and self-consciousness, also provide the opportunity to test oneself and to recognize how people are connected to each other.

## **Debris of Debris**

As conveyed through the title, the characters in the novel suffer a similar fate to that of 'debris', a concept meant to evoke the images of the physical debris left over from the destruction caused by the recently ended Vietnam War. In this case however, the 'debris' is intangible and largely internal, found in the historical setting of the book, in society, in the characters' families, and even the psychological and emotional 'debris' of each individual person. The novel is a story not unique to Vietnam, but is one that applies to any modern day post-war period. Writers' Association Publishing House I finished *Debris of Debris* today. What a marvelous novel! The inter-related stories that make up the novel are fascinating and often charming. Your variety of characters and their stories give a poignant and comprehensive portrait of, as you write in your acknowledgements, "the lost generation of young Vietnamese intellectuals." Reading their lives saddened me once again, and in a very personalized way—because I could connect to them—that once we had tried to kill each other, and too often succeeded. In short, I was both enlightened and moved by the book. I'm very impressed also that you wrote it in English. Wayne Karlin – American veteran writer - Letter to the author At the moment, Vietnamese literature is lacking such a selection for English-speaking audiences. In this sense, Vinh Quyen's *Debris of Debris* is firmly planted at the center of a cultural crossroads. Zac Herman - Youth Weekly

## **Design, Form, and Chaos**

Paul Rand's stature as one of the world's leading graphic designers is incontestable. For half a century his pioneering work in the field of advertising design and typography has exerted a profound influence on the design profession; he almost single-handedly transformed "commercial art" from a practice that catered to the lowest common denominator of taste to one that could assert its place among the other fine arts. Among the numerous clients for whom he has been a consultant and/or designer are the American Broadcasting Company, IBM Corporation, and Westinghouse Electric Corporation. In this witty and instructive book, Paul Rand speaks about the contemporary practice of graphic design, explaining the process and passion that foster good design and indicting faddism and trendiness. Illustrating his ideas with examples of his own stunning graphic work as well as with the work of artists he admires, Rand discusses such topics as: the values on which aesthetic judgments are based; the part played by intuition in good design; the proper relationship between management and designers; the place of market research; how and when to use computers in the production of a design; choosing a typeface; principles of book design; and the thought processes that lead to a final design. The centerpiece of the book consists of seven design portfolios - with diagrams and ultimate choices - that Rand used to present his logos to clients such as Next, IDEO, and IBM.

## **Disney's Land**

A propulsive and "entertaining" (The Wall Street Journal) history chronicling the conception and creation of the iconic Disneyland theme park, as told like never before by popular historian Richard Snow. One day in the early 1950s, Walt Disney stood looking over 240 acres of farmland in Anaheim, California, and imagined building a park where people "could live among Mickey Mouse and Snow White in a world still powered by

steam and fire for a day or a week or (if the visitor is slightly mad) forever.” Despite his wealth and fame, exactly no one wanted Disney to build such a park. Not his brother Roy, who ran the company’s finances; not the bankers; and not his wife, Lillian. Amusement parks at that time, such as Coney Island, were a generally despised business, sagging and sordid remnants of bygone days. Disney was told that he would only be heading toward financial ruin. But Walt persevered, initially financing the park against his own life insurance policy and later with sponsorship from ABC and the sale of thousands and thousands of Davy Crockett coonskin caps. Disney assembled a talented team of engineers, architects, artists, animators, landscapers, and even a retired admiral to transform his ideas into a soaring yet soothing wonderland of a park. The catch was that they had only a year and a day in which to build it. On July 17, 1955, Disneyland opened its gates...and the first day was a disaster. Disney was nearly suicidal with grief that he had failed on a grand scale. But the curious masses kept coming, and the rest is entertainment history. Eight hundred million visitors have flocked to the park since then. In Disney’s Land, “Snow brings a historian’s eye and a child’s delight, not to mention superb writing, to the telling of this fascinating narrative” (Ken Burns) that “will entertain Disneyphiles and readers of popular American history” (Publishers Weekly).

## **Mama Tina**

A blonde Irish woman sits in an ice-cream parlour on Le Loi Street singing, a crowd of Vietnamese street children around her, their eyes riveted on her smiling face... Christina Noble knows the pain and loneliness of being left outside the door - of having no door of one's own to walk through, for she was once a street-child herself, alone on the streets of Dublin. When she told the story of her early life in her bestselling autobiography *Bridge Across My Sorrows* she had no idea that it would prove a catalyst for so many others who had suffered childhood pain and rejection, or that it would inspire them to take the first courageous steps towards self-acceptance and their own self-healing. In 1989, driven by a dream and by the memory of her own past, she travelled 6,000 miles to Vietnam, a country of great beauty where war has left a terrible legacy. Against extraordinary odds she opened the Christina Noble Children's Foundation, a haven of food, beds, medical aid and schooling where the street children of Saigon can find safety and new beginnings under the protection of 'Mama Tina'. In this vivid and moving book Christina's compelling story continues with the amazing tale of what she and her Foundation have achieved. She takes us from the streets of Saigon to the Children's Prisons of Mongolia. A staunch campaigner for children's rights, for her there are no frontiers, only a world filled with children reaching out. Finally she returns to Dublin, where the former street orphan is officially and proudly greeted by the President of Ireland herself.

## **Understanding Vietnam**

The American experience in Vietnam divided us as a nation and eroded our confidence in both the morality and the effectiveness of our foreign policy. Yet our understanding of this tragic episode remains superficial because, then and now, we have never grasped the passionate commitment with which the Vietnamese clung to and fought over their own competing visions of what Vietnam was and what it might become. To understand the war, we must understand the Vietnamese, their culture, and their ways of looking at the world. Neil L. Jamieson, after many years of living and working in Vietnam, has written the book that provides this understanding. Jamieson paints a portrait of twentieth-century Vietnam. Against the background of traditional Vietnamese culture, he takes us through the saga of modern Vietnamese history and Western involvement in the country, from the coming of the French in 1858 through the Vietnam War and its aftermath. Throughout his analysis, he allows the Vietnamese—both our friends and foes, and those who wished to be neither—to speak for themselves through poetry, fiction, essays, newspaper editorials and reports of interviews and personal experiences. By putting our old and partial perceptions into this new and broader context, Jamieson provides positive insights that may perhaps ease the lingering pain and doubt resulting from our involvement in Vietnam. As the United States and Vietnam appear poised to embark on a new phase in their relationship, Jamieson's book is particularly timely.

## **Differentiate or Die**

"This is a sensory history and a sensual story told from street level . . . a clear and powerful account of the transformation of street life in Europe." —Leora Auslander, author of Taste and Power Merchants' shouts, jostling strangers, aromas of fresh fish and flowers, plodding horses, and friendly chatter long filled the narrow, crowded streets of the European city. As they developed over many centuries, these spaces of commerce, communion, and commuting framed daily life. At its heyday in the 1800s, the European street was the place where social worlds connected and collided. Brian Ladd recounts a rich social and cultural history of the European city street, tracing its transformation from a lively scene of trade and crowds into a thoroughfare for high-speed transportation. Looking closely at four major cities—London, Paris, Berlin, and Vienna—Ladd uncovers both the joys and the struggles of a past world. The story takes us up to the twentieth century, when the life of the street was transformed as wealthier citizens withdrew from the crowds

to seek refuge in suburbs and automobiles. As demographics and technologies changed, so did the structure of cities and the design of streets, significantly shifting our relationships to them. In today's world of high-speed transportation and impersonal marketplaces, Ladd leads us to consider how we might draw on our history to once again build streets that encourage us to linger. By unearthing the vivid descriptions recorded by amused and outraged contemporaries, Ladd reveals the changing nature of city life, showing why streets matter and how they can contribute to public life. "[A] dazzlingly kaleidoscopic overview of city life, city living, and city dying." —Judith Flanders, author of *The Invention of Murder*

In the stirring first volume of his presidential memoirs, Barack Obama tells the story of his improbable odyssey from young man searching for his identity to leader of the free world, describing in strikingly personal detail both his political education and the landmark moments of the first term of his historic presidency—a time of dramatic transformation and turmoil. Obama takes readers on a compelling journey from his earliest political aspirations to the pivotal Iowa caucus victory that demonstrated the power of grassroots activism to the watershed night of November 4, 2008, when he was elected 44th president of the United States, becoming the first African American to hold the nation’s highest office. Reflecting on the presidency, he offers a unique and thoughtful exploration of both the awesome reach and the limits of presidential power, as well as singular insights into the dynamics of U.S. partisan politics and international diplomacy. Obama brings readers inside the Oval Office and the White House Situation Room, and to Moscow, Cairo, Beijing, and points beyond. We are privy to his thoughts as he assembles his cabinet, wrestles with a global financial crisis, takes the measure of Vladimir Putin, overcomes seemingly insurmountable odds to secure passage of the Affordable Care Act, clashes with generals about U.S. strategy in Afghanistan, tackles Wall Street reform, responds to the devastating Deepwater Horizon blowout, and authorizes Operation Neptune’s Spear, which leads to the death of Osama bin Laden. *A Promised Land* is extraordinarily intimate and introspective—the story of one man’s bet with history, the faith of a community organizer tested on the world stage. Obama is candid about the balancing act of running for office as a Black American, bearing the expectations of a generation buoyed by messages of “hope and change,” and meeting the moral challenges of high-stakes decision-making. He is frank about the forces that opposed him at home and abroad, open about how living in the White House affected his wife and daughters, and unafraid to reveal self-doubt and disappointment. Yet he never wavers from his belief that inside the great, ongoing American experiment, progress is always possible. This beautifully written and powerful book captures Barack Obama’s conviction that democracy is not a gift from on high but something founded on empathy and common understanding and built together, day by day.

Painting has played a significant role in modern Vietnam. Postage stamps, billboards, and annual national exhibitions attest to its fundamental place in a country where painters may be hailed as national heroes and include among their number fervent nationalists, propagandists, even dissidents. As Vietnamese painting has gained prominence in the contemporary transnational art circuits of Southeast Asia, many artists have become millionaires, yet Vietnamese painting is generally overlooked in art history surveys of the region. Nora Taylor sets out here to change that. *Painters in Hanoi* engages with twentieth-century Vietnam through its artists and their works, providing a new angle on a country most often portrayed through the lens of war and politics. Drawing on interviews with artists, cultural officers, curators, art critics, and others in Hanoi, Taylor surveys the impact artists have had on intellectual life in Vietnam. The book shows them within their own complex community, one fraught with tensions, politicking, and favoritism, yet also a sense of belonging. It describes their education, the role of the government in the arts, the rise and fall of individual artists, their influence as active players in the politics of place and gender, the audience for their work, and how tourism and the international art market have influenced it.
